

if iam willing to pay for a service that helps me out in my job i dont feel that anyone has a right to stop me. i am a truck driver who depends on satellite radio for weather forecasts in the citys that i travel as well as good features that xm carries. if stations could carry channels that you could keep more than twenty minutes we would not have a need for xm or any other pay stations but they don't. keep out of our business--please. a satisfied customer. ps a lot of truck drivers are depending on this service and have a right to it!
